

Guide for Parents

Student Internet Safety

1. Never post your personal information such as cell phone number, address, or the name of your school online.
2. Be aware that information you give out through any website could put you at risk of bullying and other types of victimization.
3. Never agree to meet in person with anyone you first “met” online.
4. Posting information about your friends puts them at risk.
5. Never respond to harassing or rude texts, messages, and e-mails.
6. Never give out your password to anyone other than your parent or guardian.
7. If you wouldn't say something to another person's face, don't post it online!
8. Think before posting your photos. DO NOT post or send semi-nude or nude pictures of yourself or anyone else!

Kajeet SmartSpot®

What is the Kajeet SmartSpot®?

The Kajeet SmartSpot is a portable Wi-Fi hotspot device that provides your child with safe, education-only Internet access wherever there is cellular coverage.

What does it do?

Once your child leaves the school building, he or she will be able to access the Internet to complete homework assignments, read online textbooks, collaborate with classmates or connect with teachers. Your child will not be able to access any entertainment, adult or inappropriate content.

What information can the school track on this device?

The Kajeet SmartSpot is provided by your school for your children to access the Internet for *educational purposes only*. The school will have the capability to track device usage trends such as what sites are visited and how much data is downloaded; however, no private information (such as student name, login information, account numbers, etc.) is collected or retained.

Why can't I get to certain websites?

Kajeet filters out non-educational sites. Your school district may also be filtering out social and streaming media to keep students focused on school work. The Kajeet SmartSpot adds another level of security with filtering policies that block harmful content such as websites containing malware, viruses, proxies, and phishing.

What if my Kajeet SmartSpot doesn't work?

Who do I contact?

If you have questions regarding the Kajeet SmartSpot, please contact your designated school technology advisor.
